

HOOKUP DIAGRAM GIBSON LES PAUL® TYPE GUITAR WITH SUSTAINIAC® INSTALLED

The three existing switch wires run in a channel. Don't remove them. It is easier to connect the Orange wire to existing shielded wire

* Red/white wire connection as shown is the humbucker "coil tap". This may not be present on stock pickups.

All shields connect to pot bodies and to ground. Don't forget to connect bridge ground (or trem springs)

IMPORTANT: DRIVER POLARITY
Use polarity shown for standard bridge pickups having "negative-on-pullaway" polarity. For pickups having "positive-on-pullaway" polarity, reverse the driver red and black wires.
