

OEM #9
2PU TELE SW

JACKSON
2-HB
HOOKUP DIAGRAM
Sustainiac Rev. 5
(Shows NPU boost switch)

VERY IMPORTANT

1. If push-pull neck pickup volume switch is used, you can solder ground wires to body of pot, or to grounding tab. Don't solder to switch body to prevent melting of internal plastic parts.
2. **9-VOLT BATTERY:**
Use only **ALKALINE** battery.
Add plastic wire tie to prevent lead breakage.
3. Rev.5 connectors are 6,8 pin.
All previous connectors are 4, 8 pin.

TONE POT

OPTION: Use push-pull switch/pot for neck pickup gain boost

SUSTAINER DRIVE POT:

25K pot, gray connects to ground for minimum sustainer drive.
